

“

I see no contradiction between profitable business and social development. In fact, there is synergy between the two. Working together with government, there is so much we can do to solve our planet's problems.

”

ANAND MAHINDRA
CHAIRMAN, MAHINDRA GROUP

The Perfect Gentleman

CHAIRMAN OF THE US\$19 billion Mahindra Group and the Executive Chairman of Mahindra & Mahindra Ltd, Anand Mahindra is an incisive business commentator and humanitarian. With over 6 million followers on Twitter, Mr Mahindra leads by example.

Among his many social change initiatives is the Nanhi Kali programme which, for over 20 years, has provided over 250,000 underprivileged girls access to quality education. He is Chairman of the Board of the

Naandi Foundation, India's leading NGO educating girls, skilling youth and providing sustainable livelihoods to small farmers through biodynamic agriculture.

Anand also serves on the Founders Board of The Rise Fund, a US\$2 billion impact fund. He is a strong votary of the arts and culture. Mahindra Blues, Mahindra Excellence in Theatre Awards and Mahindra Sanatkada celebrate and nurture music, theatre culture, art and history in India. He also serves as a Trustee of the

Introducing Anand Mahindra, the newest Honorary Member of the Rotary Club of Bombay

Natural History Museum of London and as Chairman, India Advisory Council of the Lincoln Center, New York City.

In 2016, he was appointed Chevalier de l'Ordre national la Légion d'Honneur (Knight in the National Order of the Legion of Honour) by the President of the French Republic. In 2014, he became the first Indian recipient of the Harvard Medal by the Harvard Alumni Association given for extraordinary service to Harvard University. Anand graduated from Harvard College in 1977 and secured

an MBA from Harvard Business School in 1981.

His tenure at the Mahindra Group has seen it expand domestically and internationally into a range of major industrial sectors from automobiles and agriculture to IT and aerospace.

Anand has served on several influential bodies, both national and international.

President's Message

Dear Friends,

As we all ushered in the new year, our fellow Rotarian Dinesh Daftary lost his beloved wife, Dr. Rajani Daftary, on January 1st. Our sincere condolences to the entire Daftary family.

We are happy to welcome into our midst an industrialist with a heart of gold, Anand Mahindra, Chairman of the Mahindra Group. We induct him as an Honorary Member today. Anand Mahindra's legacy as a world business leader as well as a humanitarian is inspiring.

Friends, I am also glad to inform you that our Club, under the leadership of IPP Ramesh Narayan, received a handful of awards from the District last week. This shows that when you entrust a great team with responsibility, the outcome is always splendid. Congratulations to last year's team.

I thank Rtn. Rajas Doshi for his magnanimous donation towards the new Bhavishya Yaan school.

Our first fund-raiser for the year 2019 is on January 18th at the Asiatic Library's Darbar Hall. We request you all to join us in large numbers. Together, let's do the best we can.

Thank You!

**Rtn. Vijay Jatia,
President**

'Stay curious'

A pioneer in the field of chemical engineering, Prof. M. M. Sharma asks inventors to think laterally and investors to encourage blue sky research

'Increasing use of technology has caused rapid development in the world'. It is not difficult to find some version of this line in almost every school textbook. But how has technology lead to development, asked last Tuesday's guest speaker Prof. M. M. Sharma. Speaking to Rotarians on the Role of Innovation in Success, this Padma Bhushan and Padma Vibhushan awardee simplified the equation down to: 'Technology is Science that Makes Business'.

He said, "Innovation never comes without invention and invention never comes without blue sky research." Prof. Sharma, who has advised some of the top

companies in the world including Dow, DuPont, Reliance and Sabic, pushed for more acceptance of blue sky research which is a scientific approach in itself. Instead of being goal-oriented, blue sky science is more curiosity driven.

Prof. Sharma said he

appreciated China's progress due to its out-of-the-box research methods and encouraged greater provision for such research in India. Research is the most important part in any invention, he said, as, equally, is chance or coincidence. Prof Sharma astonished Rotarians

Rtn. Madhusudan Daga, Rtn. Moy Biswas and Rtn. Ashok Minawala

Nadir Godrej presents the Sohrab Godrej Science and Technology Award to Prof. M. M. Sharma. Seen here with Rtn. Shernaz Vakil and President Vijay Jatia

with several examples of serendipity in invention.

He said, "While invention is an idea, innovation is when the idea is converted in to commerce." The spectrum of application for any invention can be broad; one can never know how far the invented product will go. For instance, laser technology is now used in both surgery and the cutting of diamonds. The keystone behind such invention is fundamental research. Success comes when inventions become money spinners.

Amongst the world's foremost experts in chemical engineering, Prof. Sharma threw a little chemistry at the members while explaining the impact of high science and inventions in MRI machines and its functioning. One of the main elements

for the functioning of MRI machines is Helium which, after a massive shortage, is now produced in Qatar's LNG plants at a very large scale, at about minus 100 degree Celsius. Thus, high science converted to business makes a big impact on society.

LED technology was born out of curiosity, said Prof. Sharma. This kind of curiosity came from crazy individuals obsessed with invention. He appealed to corporates to support inventions even if not immediately profitable. A climate of invention is necessary. Another appeal he made was to the families of young, innovative minds: encourage them instead of curbing them. One cannot invent without failure and more the failure, more the curiosity, better the innovation.

Rtn. Satya Bansal, Rtn. Ashok Jatia, PE Rtn. Preeti Mehta, President Vijay Jatia with PP Rtn. Pradeep Saxena and PP Rtn. (Dr.) Mukesh Batra

Prof. Sharma, a highly decorated UDCT (now known as Institute of Chemical Technology, Mumbai) alumnus, said he believes that the future of plastic is bright. It is a material used in more than half of our daily life's needs, from communication to transport. Thus, to conclude, Prof. Sharma believes that unless

we invent and innovate, our growth will be economically slow.

If India is to make rapid economic progress, it is not going to be on borrowed technology. We need to develop our own tech, and to not forget that innovation is not a one-time activity, it is a process that is continuous.

Continued from Page 1

These include the Global Board of Advisors of the Council on Foreign Relations, New York, the World Bank Group's Advisory Board for Doing Business and the International Advisory Council of Singapore's Economic Development Board.

He co-chaired the Bloomberg Global Business Forum 2017 and is co-hosting the Global Climate Action Summit 2018. He has served as President of the Confederation of Indian Industry.

He also served on the Boards of the National Stock Exchange of India and the National Council of Applied Economic Research, as Chairman of the Governing Council of the National Institute of Design and the India Design Council. Anand has been invited by the Central and State Governments to provide his inputs on matters of national importance.

Anand Mahindra is a perfect gentleman. The Rotary Club of Bombay welcomes Anand as an Honorary Member.

Prof. M. M. Sharma receives the Sohrab Godrej Science and Technology Award

A poem, by Nadir Godrej, January 8, 2019

Sohrabji was a man of many parts.
He was a great admirer of the arts.
A pioneer environmentalist
Whose early warnings many missed.
But he played a significant role
In saving the tiger, a primary goal.
And he was constantly on the go.
One word he didn't understand was slow.
Sometimes, within the span of a day,
He'd see Madras, Calcutta and Bombay.
The day for him was short on hours
But with his superhuman powers
He'd often work quite late at night
And travel on a red-eye flight.
This schedule would cause me to weep.
When did he find the time to sleep?
No wonder he would sometimes sink
His head and calmly take a wink
But if asked to answer, he would rise
And to the audience's great surprise
He'd manage to say what's apropos.
But how he did it, I'll never know.
There is no place he hasn't been.
All seven continents he'd seen
And even to the remotest isle,
He's visited for a while.
And though he traveled far and wide
Religiously he always tried
To attend every Rotary meeting,
A perfect record without cheating.
On attendance he was always bent
No matter what the continent.
We are grateful for this commemoration
Through this prestigious award and oration.
And as a Chemical Engineer
I wholeheartedly would cheer
The choice of Dr M M Sharma
Who is both brilliant and a charmer.
With Professor Sharma what we see
Is a long connection with UDCT.
As student, professor and director
A steady, upward pointing vector.
Repeatedly offered a government role
He had just one steadfast goal
To always serve his Alma Mater,
As nothing else was ever greater.
And yet he ranged far and wide
Took many roles in his stride.
He helped research and education
To reach new heights in our nation.
He taught abroad both East and West.
As an engineer he was the best.
He occupied a lofty perch
In every kind of research.
Both in theoretical analysis
In mass transfer and catalysis
As well as practical advice
Which for us was very nice.
His intellect was the foundation
Of the Chemical Industry in our nation.
His dreams were always very bold
But the rest of us, truth be told,
Didn't have the guts or gumption
To accept his every assumption.
And that of course is a shame.

- Though when we chose to play his game
- We benefited considerably.
- Sometimes we missed, regrettably.
- He circulated ideas on a chit
- And many turned out to be a hit!
- He got every honour and award
- Whether in India or abroad.
- This may sound like hyperbole
- But if you were just to see
- The lengthy and illustrious list.
- You'd realise none were missed!
- And for his national contribution
- He received Padma Bhushan and
- Vibhushan!
- The highest point intellectually
- Was Fellow of the Royal Society.
- Therefore it is no surprise
- When Professor Sharma wins a prize!
- And it is to be expected
- Our paths have often intersected.
- This connection we can see
- In Academia and Industry.
- The relationship ship goes way back
- And has always stayed on track.
- Doctoral students at UDCT
- Were advised on their PhD
- By my late father Dr BPG
- And UDCT's consultancy
- Helped our businesses to grow.
- Many benefits did flow.
- In India the need was clearly seen
- To produce Alpha Olefin.
- The industry determinedly fought
- But the Government would not support.
- Technology fees were denied
- And that is when my father tried
- An unusual Oleochemical route
- With Lurgi's help this bore fruit.
- My father's faith was in the cause
- Professor Sharma saw the flaws.
- I was wary but played along
- However things went very wrong
- I wondered why we had invested
- In something strange and so untested
- As making Olefins from vegoil.
- It hardly seemed worth all that toil.
- But Alcohol was an intermediate
- Not Ethyl which gives an immediate
- Kick to all those who imbibe it.
- And for this audience I'd describe it
- As from C 12 to C 18.
- A change in strategy was seen.
- And Doctor Sharma's helping hand
- Enabled us to understand
- The limited market in our land.
- But globally we could expand.
- Our ties with ITC were strong
- And have lasted very long
- Through all name changes that we see
- And in my father's memory
- We built a lab and student centre
- That are a boon to all who enter.
- And if should be clearly stated
- By Sohrabji these were inaugurated.
- And therefore it is no surprise
- That the Chemical Engineering prize
- Instituted in my father's name
- To commemorate his fame
- Was indeed conferred upon
- Professor Sharma early on.
- Without notes he always stood
- His memory's so very good.
- While teaching at Delaware
- Dr. Mashelkar did declare
- Professor Tom Kill would recall
- That in his Cambridge days all
- Students eschewed the library
- As all of them could clearly see
- There was no need to go and browse
- When Sharma knew the whats and hows.
- And its location was known by none
- Till Dr Sharma's days were done!
- His values were always very high
- For his students he would try
- And help in every possible way.
- And even in bereavement, one day,
- He quickly put aside his grief
- Because of his strong belief
- That personal grief must give way
- To a student's need any day.
- Nor would he play the common game
- Of adding a superfluous name
- To a student scientific paper
- Apparently a common caper
- But one to which he'd never stoop
- Even before entering the loop.
- Because he always kept in sight
- What action is completely right.
- His professors once felt quite trapped
- When consultancy fees had been capped.
- Universities got their own share
- So any cap wouldn't be fair.
- But envy always makes one burn
- Vice Chancellors couldn't quite earn
- As much as professors in demand
- Who naturally could command
- Fees that were rather high.
- That obvious thought though didn't fly.
- Then through his missive he insisted
- And he prevailed since he persisted.
- And what will be his legacy?
- In large measure ICT.
- The entire genealogy
- Of those who got their PHD.
- And over time we will see
- A broadening family tree.
- His contribution to Chemistry
- And India's burgeoning industry
- Not only all that's chemical
- But also pharmaceutical.
- At UDCT he was in charge.
- His contribution's very large.
- And we have the greatest pride
- That we can call him friend and guide.
- For service to research and education
- Let's rise for a standing ovation
- And then listen to his oration
- On success through innovation.
-
-

Six new feathers in RCB's hat

The Rotary Club of Bombay bagged awards for six different categories at the District Award held on January 6, 2019.

RCB won awards for:

- Best Service to Youth
- Best Bulletin
- Best Public Relation
- Outstanding work by a Club in Promotion of ethics
- Outstanding work in all 4 Avenues of Service
- Maximum Women members in a club

Congratulations IPP Ramesh Narayan and team for their hard work.

RI Dist.3141 hosts three-day mega medical camp

The Rotary Club of Bombay is participating in a free, multi-purpose mega medical camp in the Phoenix Mills Compound, Lower Parel (W), from January 18 to 20 (10 am to 5 pm). Rotarians are requested to join doctors and yoga teachers from Kaivalyadham, Lonavla and Mumbai to bring attention to

'Yoga as a means of Health and Healing' at the RCB stall. Please also encourage friends and family members to participate.
