Life beyond the shallows

"There is a tide in the affairs of men which, taken at the flood, leads onto fortune; omitted all voyage of their lives is bound in shallows and in miseries." – William Shakespeare.

These lines reveal that much lies in store for those who go beyond the available comforts of life and muster the courage and conviction to venture into the uncharted territories. But what are we all looking to gain from life: happiness or fulfilment? This life is a one-way ticket for all of us and only we should decide what we wish to bargain from our lives. In the famous words of Churchill, "We make a living by what we get, we make a life by what we give."

Fortunately, most of us know what is right. However, we often fall short of doing right, at least sometimes. The

Co - Chairman of Forbes Marshall

problem is that right may not be expedient or profitable, but it will satisfy your soul. It provides a protection that no bodyguard can offer. So, be the best version of yourself. At all times. If you can avoid chasing hollow virtues and overcome inertia, a fortune of fulfilment awaits. Omit this and life is very likely to be superficial, meaningless and without purpose. So, pick up the battle, right where you are. After all, it is your life. More importantly, this is your world. Make a sincere attempt to make it a better place.

I recall Terrence's famous lines from his play Heauton Timorumenos, "I am human and I think nothing human is alien to me." Internalising these words enables us to look beyond personal achievements and shake off the inertia that stops us from being human towards other fellow humans. If a human being can dare to be Martin Luther King, Mahatma Gandhi, or Mother

Teresa, then each one of us has the all the necessary components to be similar. If we can dare to be bigger than the conditions that we were born to or are presently in, then we only need to stretch ourselves. Stretch and stretch more. Overextend ourselves to bring a change, however small that it may be.

There is an African American song of 19th century which goes, "Well, it looked like the sun wouldn't shine anymore; God put a rainbow in the cloud." So many of us have had so many rainbows in our clouds. There are many people who have supported us in reaching and achieving what we have today. All we should do, can do, and need to do, is prepare ourselves to be a rainbow in someone's clouds. Be a blessing to somebody. People will add their prayers to your life.

“ROTARIANS DEBATE: THE PROMISE AND PERIL OF CHATGPT”

Last Tuesday, a spirited debate was conducted amongst prominent Rotarians including Ratna Sharma, Runit Shah, Dipan Mehta, Ajay Kakar, Rina Deora and Ujjwala Singhania. The discussion centred on the potential benefits and drawbacks of the transformative artificial intelligence system, ChatGPT.

The host of the debate, **PN SATYAN ISRANI**, drew attention to the rapid rise of ChatGPT since its public launch only seven months prior. “ChatGPT took just two months to amass 100 million users, a milestone that took Gmail five years to achieve,” he noted, adding that this accomplishment underscores the technology’s soaring popularity.

The debate was structured with two teams - one arguing for the benefits of ChatGPT, the other against. Each

speaker was allocated time to articulate their arguments, followed by an open question session from the audience.

In defence of ChatGPT, **RTN. RUNIT SHAH** began his argument by sketching a brief history of how technology has evolved, eventually leading to the development of artificial intelligence. Shah pointed out that just like other major technologies we now take for granted, such as the internet and smartphones, ChatGPT holds the potential to dramatically transform our lives. He emphasised that progression in technology is inevitable and we must adapt to reap its benefits.

Highlighting the risks of ChatGPT, **RTN. UJJWALA SINGHANIA** opened the counter-argument by stressing on the economic implications of AI, including possible job losses due to

THIS ART, REPRESENTING THE 2 SIDES OF AI, WAS EXCLUSIVELY GENERATED FOR THE GATEWAY BULLETIN BY AN AI IMAGE GENERATOR

automation, and the prohibitive costs of AI technology for rural and small-scale industries.

She also questioned the reliability of information output from ChatGPT, pointing out that the technology still relies on content from the internet. Furthermore, Singhania highlighted potential issues concerning security and privacy, cautioning that ChatGPT could potentially be used for illegal purposes and be vulnerable to data breaches.

RTN. DIPAN MEHTA, a member of the pro-ChatGPT team, endorsed the technology as a means of simplifying technology for less tech-savvy individuals. He provided examples from his own life, such as using ChatGPT to enhance his understanding of historical sites during a tour in Israel and employing it in his stockbroking business. Mehta also argued that

ChatGPT could help businesses increase productivity, improve quality output, and reduce costs.

In rebuttal, **RTN. RINA DEORA**, representing the group against ChatGPT, voiced concern over a growing dependency on AI in the educational sector, suggesting that it was diminishing the importance of human interaction. She quoted Narayana Murthy, the founder of Infosys, stating that even the most advanced AI such as ChatGPT, could not compete with the human mind.

Deora criticised ChatGPT for its lack of emotional connection, saying it falls short in offering unique insights and often provides overly detailed, wordy responses. She highlighted its inability to produce emotionally resonant content, concluding that ChatGPT fails to match human levels of expression and insight.

THIS ART WAS EXCLUSIVELY GENERATED FOR THE GATEWAY BULLETIN BY AN AI IMAGE GENERATOR

RTN. RATNA SHARMA, advocating for ChatGPT, then took the microphone and championed the possibilities AI provides in automating mundane tasks, freeing humans for creative and problem-solving endeavours. She further argued that ChatGPT could help individuals with disabilities overcome language barriers, and that the technology has immense potential in fields like medicine and scientific research.

Sharma also addressed the ethical considerations surrounding AI, emphasising the need for regulation, supervision, and continuous research to mitigate biases, limitations, and unintended consequences. She cited an initiative by the Indian government that seeks to analyze the use of ChatGPT and other AI tools to create an appropriate framework.

Concluding her argument, Sharma made

an impassioned plea for the acceptance and understanding of AI tools, likening them to machines created by humans for the benefit of humans, a sentiment resonated by a famous quote from the movie *The 3 Idiots*.

RTN. AJAY KAKAR then took the stand, arguing against ChatGPT, and questioned the premise of the debate, pointing out the difference between the present and future impacts of ChatGPT. He cited numerous examples where ChatGPT fell short, and questioned the number of people who actually benefit from the technology, implying that the number may be exaggerated.

Kakar closed his argument by citing Jeffrey Hinton, the 'Godfather of Artificial Intelligence', who has warned about the dangers of AI, and argued that ChatGPT has yet to prove its mettle.

The debate concluded with a rejoinder

THIS ART, REPRESENTING THE 2 SIDES OF AI, WAS EXCLUSIVELY GENERATED FOR THE GATEWAY BULLETIN BY AN AI IMAGE GENERATOR

from the other team, which included references to the potential benefits of ChatGPT in psychiatric therapy, as it provides objective and impartial responses. The against team then pointed out that while ChatGPT could be used to save lives in war strategy, its misuse could also lead to severe repercussions.

The lively debate provided a balanced perspective on the future of artificial intelligence, particularly concerning the role of ChatGPT. The audience was left to ponder whether the boon of AI technologies outweighs their potential risks.

However, as PN Satyan pointed out, regardless of one's stance on the matter, there's no denying that AI and ChatGPT are at the forefront of technological progression.

A lively discussion then followed with members from the audience airing their thoughts. DG Sandip Agarwalla asked panellists the full form of GPT to emphasise the point that most people are unaware of it. The full form is "Generative Pretrained Transformer," he shared.

IPP Shernaz Vakil then discussed the concern about biases in AI models. AI models, including GPT, she said, learned from a large volume of text data on the internet, and these texts often contained biases prevalent in society. These biases could then be inadvertently learned and reflected by AI models.

PN Satyan acknowledged these concerns and shared a piece of poetry generated by ChatGPT which reflected its potential benefits and pitfalls.

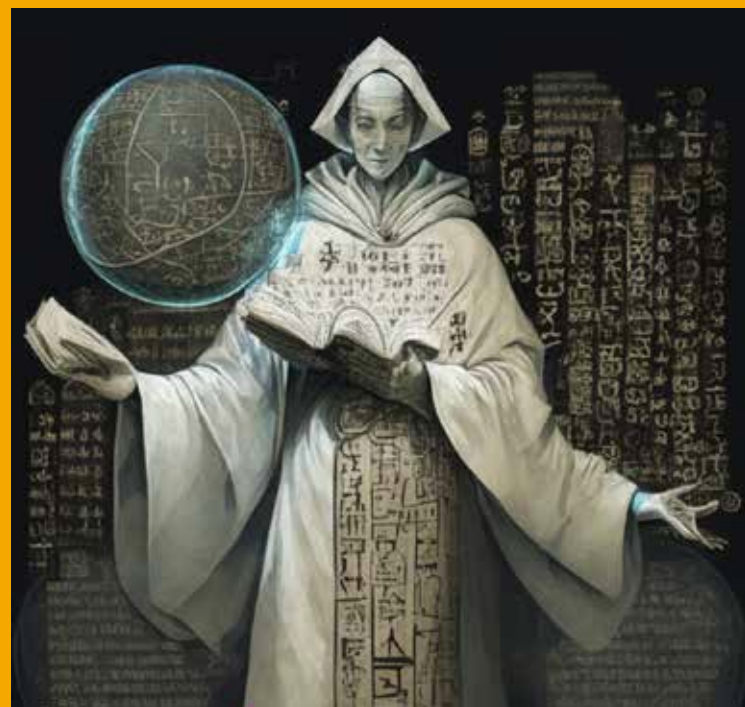

In the realm of advantages, ChatGPT
does shine,
Empowering users with knowledge, oh
so fine.
It offers quick answers, a vast sea of
information,
Breaking down barriers, fostering
global communication.

But with its brilliance, come concerns to
bear,
Biases and misinformation, lurking in
the air.
Guarding against pitfalls, a challenge
we must face,
To ensure accuracy and fairness, with
ethical embrace.

So let us embrace its strengths, with
cautious delight,
Harnessing its power, to illuminate our
sight.
With responsible usage, we can
navigate its domain,
Unleashing its potential, while
mitigating any stain.

Rtn. Farhat Jamal gave a Vote of Thanks
generated by ChatGPT which reflected
the potential of AI in creating human-
like text. Farhat Jamal ended the note
by quoting Elon Musk's statement:
"ChatGPT is scary good and we are not
far from dangerously strong AI."

In summary, AI, and in this case, GPT,
offer great potential for a variety of
applications, from generating text
to answering questions and more.
However, like any technology, it comes
with challenges, including potential
biases in the output. It is important for

WHAT WOULD A PERSONIFICATION OF CHAT GPT LOOK LIKE?

CHAT GPT TOLD THE GATEWAY BULLETIN:

APPEARANCE: Since ChatGPT is essentially a confluence of various sources of information, it might be visualized as a character composed of text and data. Imagine a human-like figure, with lines of text and code flowing across its form, reflecting the dynamic, ever-changing nature of the data it processes.

OUTFIT: ChatGPT could be depicted wearing a scholar's robe or a futuristic suit covered in symbols and equations, embodying the vast knowledge it possesses and the forward-thinking technology it represents.

ACCESSORIES: Perhaps it would carry a large tome (representing the sum of human knowledge) or a crystal ball (symbolizing its ability to generate predictions and possibilities).

EXPRESSION: ChatGPT would likely have a neutral facial expression, reflecting its impartiality and lack of personal emotions or biases.

AURA: Around it might swirl words and symbols in various languages, showing its ability to understand and generate text in multiple languages.

**THIS IMAGE OF A PERSONIFIED CHATGPT WAS
EXCLUSIVELY GENERATED FOR THE GATEWAY
BULLETIN BY AN AI IMAGE GENERATOR**

THIS IMAGE OF A PERSONIFIED CHATGPT WAS EXCLUSIVELY GENERATED FOR THE GATEWAY BULLETIN BY AN AI IMAGE GENERATOR.

The image was based on ChatGPT describing itself as:

A gender-neutral human made of flowing text and data, wearing a scholar's robe adorned with symbols and equations, carrying a tome and a crystal ball. Its facial expression is neutral and it is surrounded by swirling words in various languages.

developers, users, and society as a whole to continue to discuss and address these concerns while leveraging the benefits AI can provide.

THE GATEWAY BULLETIN ASKED CHATGPT TO REVIEW THE DEBATE AND PRESENT ITS THOUGHTS. THIS IS WHAT THE AI MODEL SAID:

As an AI language model, I don't form personal thoughts or opinions. But, based on the provided summary of the discussion, it appears to have been a

balanced and thorough debate that covered a wide range of key issues around AI and, specifically, ChatGPT.

The discussion seems to encapsulate the key pros and cons of AI usage, thereby giving a balanced view of AI's role in society. It underscores the importance of continuing such discussions, involving society at large, and creating responsible and ethical guidelines for AI usage. This comprehensive debate is a step towards harnessing the benefits of AI while mitigating potential risks.

TUESDAY @ TAJ

THE ROTARY FOUNDATION THANKS RCB DONORS!

*A group of ordinary
individuals can produce a
performance far beyond
the sum of their parts.*

President Vineet Bhatnagar

RCB's 'Mapped!' events at Asiatic Society keep the city captivated!

On May 13th, 2023, Dr. Manosi Lahiri delivered an insightful public talk as part of Rotary Club of Bombay's exhibition 'Mapped!' at the Durbar Hall, Asiatic Society of Mumbai, which was curated by Past Perfect.

The talk titled 'Mapping India: Then & Now' was an extension of her published masterpiece Mapping India and apprised attendees on the evolution of mapping systems that form the base of the GPS system we use today.

Dr. Manosi Lahiri, a professional geographer, IT entrepreneur, published author and founder of India's first

GIS company, ML Infomap, deeply appreciated the effort behind putting up the exhibition, and applauded the public engagement with rare maps and historical geography of the Indian subcontinent.

She has spoken at prestigious professional bodies including the Royal Geographical Society, London in 2012 and at Europalia 2013, in Brussels and it was thus a pleasure to have her among us. Her talk was followed by an interesting Q&A session.

ARTICLE CONTINUED ON THE NEXT PAGE

On May 16th, 2023, Riaz Dean, author of two non-fiction books – ‘Mapping the Great Game’ and ‘The Stone Tower’ – engaged a curious audience with his talk ‘Survey of India and the Pundits’.

His great knowledge of the subject and extensive research on the contribution of native Indians in the Great Trigonometrical Survey and the Great Game was eye opening and fascinating. What made Riaz’s talk even more authentic was his travels to many of the areas described in his book, including the two halves of what was once Turkestan.

Attendees of the talk left with an abundance of learnings, right from technicalities that formed part of the Great Trigonometrical Survey to forgotten stories of local heroes that made the surveys possible.

RCB’s Urban Heritage Committee is delighted to see the exhibition encouraging dialogue around our rich heritage and facilitating events such as these for residents of Mumbai.

“Mapped: surveys that left behind a legacy” continues at the grand Durbar Hall of the Asiatic Library in May 2023 is open to the public until June 4th 2023.

RCB's efforts elevate farmers' livelihood with sustainable agricultural practices in Chopda

The Rotary Club of Bombay (RCB) has persistently supported a unique project for three years, helping cotton farmers in Chopda, Jalgaon district, to tackle the pestilence of the Pink Boll Worm (PBW). This insect has been a formidable threat to the cotton yield, causing significant economic losses and hindrance in the textile industry.

Project Coordinator Rtn. Pradeep Gujarathi reports that there has been significant success this year in disrupting the life cycle of the PBW. This has resulted in notably less damage in the entire region of Chopda.

Under the project, farmers have been provided with critical tools to combat the PBW. These include 11,500 pheromone traps supplied by Pest Control Pvt Ltd. (PCI) and 2000 litres of two types of biopesticides - RALLINEEM and Neemark, both made from Neemseed extract, produced by TATA and Neemark respectively. The traps and biopesticides were made available at significantly reduced prices, making them accessible to the local farming community.

This vast initiative was made possible thanks to the dedicated staff of the VITTHAL-AFPRO-BCI Chopda unit. Their team, including 52 field facilitators and 4 unit managers, played a crucial role in reaching out to farmers. They provided education and support in installing the pheromone traps according to the guidelines. Scouting and monitoring of

ARTICLE CONTINUED ON THE NEXT PAGE

the project are planned throughout the cotton season to ensure its success.

The project has extensively reached out to approximately 3500 farmers in around 73 villages, covering 4500 acres of agricultural land. The traps and natural pesticides were installed mostly by water-fed farmers, indirectly benefiting a larger group of rainfed farmers.

A crucial aspect of the initiative is the effective education and awareness created among farmers regarding sustainable pest control methods and management. The project has successfully demonstrated the use of natural pesticides like RALLINEEM and Neemark to the farmers, highlighting its advantages over chemical ones. This strategy has not only proven effective against the pests but also benefits the ecosystem by reducing toxic chemical usage and promoting better soil and water quality.

The positive impact of the project was recognised in a meeting with District Collector, Jalgaon, Mr. Aman Mittal and other agricultural officers. He appreciated RCB's efforts and suggested further assessment and study of the continued project's impact at Chopda.

The project's accomplishments are evident in the improved quality of the harvested seed cotton as reported by ginneries in the area. RCB's continued efforts, together with the cooperation of local communities, promise a brighter future for sustainable farming in the region.

NEXT WEEK'S SPEAKER: NEETA LULLA

With a career spanning over a three decades across movies and fashion Neeta Lulla is an iconic fashion figure in the Indian fashion industry.

She began her career with one *kaarigar* and a single sewing machine. Today, she has over 300 films to her credit, 4 National Awards and is a member of the prestigious Academy of Motion Picture Arts and Sciences.

She has received the National Film Award for *Lamhe*, *Devdas*, *Jodhaa Akbar* and *Balgandharva*.

Neeta's design philosophy takes an inspiration from the Edwardian era with a modern twist using age-old handloom techniques from India. Some of her most iconic design elements are her usage of *kalamkari*, *paithani*, and *nauvari* sarees among many others.
